

DATASHEET (Globalscape)

# Advanced Authentication Modes Module for Globalscape EFT™

The Advanced Authentication Modes Module (AAMM) for Globalscape EFT enables organizations to centralize their user access controls, improve productivity, and increase adherence to security policies. In addition, the AAMM provides administrators with the ability to easily maintain password security in one location to quickly commission and decommission user provisions in one central location.

The AAMM provides SAML (WebSSO), RSA® SecurID®, RADIUS, and CAC support.

If your organization is looking for the utmost in control and authentication standards to support your security policies, the Advanced Authentication Modes Module for Globalscape EFT is your easy-to-implement solution.

## PRODUCT SUMMARY

### KEY RESULTS

#### Authenticate securely

- Provide smart card, single sign-on, and multi-factor authentication options
- Enforce existing security policies in edge applications
- Support for SAML, SSO Radius, RSA SecurID®, CAC

## Secure Authentication Options

Globalscape EFT's AAMM eliminates the need to create and track built-in, user, and administrator accounts by using your existing Active Directory infrastructure for account creation. This helps you maintain the security of your accounts in one location. Additionally, the AAMM provides for easy-to-use authentication methods, including SAML (WebSSO), RSA® SecurID®, RADIUS, and CAC support.

Globalscape EFT's AAMM can be your single source of authentication across the many IT resources you use, including EFT. For user authentication, you can use an AD, NTLM, LDAP, or ODBC-compatible database, or Globalscape EFT's built-in authentication manager.

### Key Advanced Authentication Modes Module Features

- SAML (WebSSO)
- RSA SecurID®
- Radius
- CAC (Common Access Card authentication)
