

# EFT™ INSIGHT MODULE

## KEY RESULTS

**Visibility** into your EFT platform transfers and event rules

**Instant status of your system** for improved monitoring

**Faster, easier data browsing** through advanced filters and responsive interface

**Improved inquiry resolution** to reduce IT overhead

**Automate business expectations** to save on unmet SLAs and processes

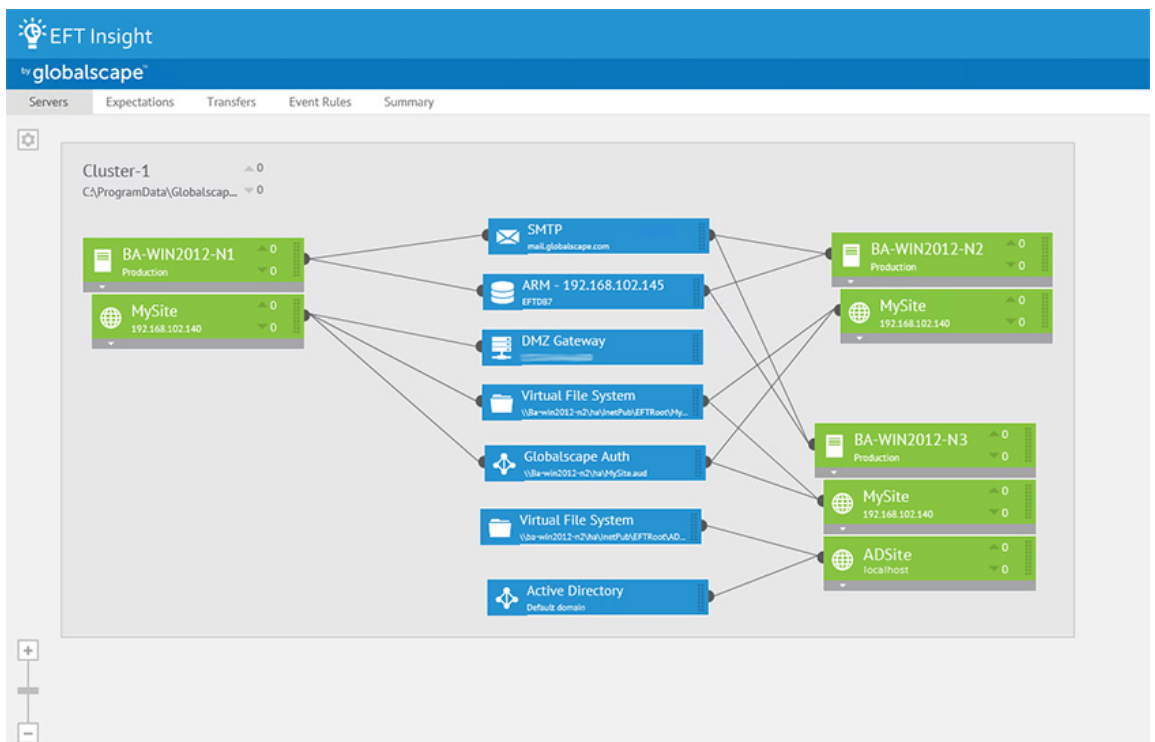

**Isolate information** from administration so users can learn from your data

As the complexity of managing data flows to and from the organization has increased, companies have consolidated and replaced their aging file transfer systems with enterprise-grade Managed File Transfer (MFT) solutions. The data flowing through these systems is critical to businesses. This includes the need to surface the operational and business intelligence needed to ensure that SLAs are being met, standards and policies are being adhered to, and business continuity is being maintained, as data flows into and out of the organization.

EFT Enterprise offers business activity monitoring with EFT Insight. Gain full visibility into the flow of data through your EFT Enterprise system. EFT Insight facilitates better governance with the knowledge and depth of information gleaned from business and operational intelligence. Evaluate data trends over time and gain instantaneous knowledge about the current state of your system.

## EFT INSIGHT MONITORS CRITICAL DATA FLOWS SO YOU CAN MANAGE THE REST OF YOUR NETWORK

A rich set of filters and responsive interface enable investigation at any granularity, as well as an array of metrics for an all-around server status. EFT Insight gives you the power to drill down into important data from your system, to quickly cull the information you need to run effectively and efficiently. Data is consolidated from multiple EFT Enterprise nodes, making the management of EFT Enterprise clusters easy.

## ABOUT GLOBALSCOPE

Globalscape is a pioneer in securing and automating the movement and integration of data seamlessly in, around and outside your business, between applications, people and places, in and out of the cloud. Founded in 1996, Globalscape's data exchange and integration software and services are trusted by over 13,000 customers in over 150 countries worldwide, including global enterprises, governments, and small and medium enterprises. Headquartered in San Antonio, TX, Globalscape enables companies to increase business agility by unleashing the power of data. Whether you are a line-of-business stakeholder struggling to connect multiple cloud applications or an IT professional tasked with integrating partner data into homegrown or legacy systems, Globalscape provides cloud services that automate your work, secure your data and integrate your applications – while giving visibility to those who need it. Globalscape makes business flow brilliantly. Globalscape has consistently been named a top workplace by Computerworld, the San Antonio Business Journal, Texas Monthly, and the San Antonio Express-News, among others.

## EFT INSIGHT DATABASE

A unique database for EFT Insight facilitates improved performance under large data sets and heavy usage, ensuring robust reporting for even the largest EFT Enterprise deployments.

Numerous business-critical processes take place in your network every day. EFT Insight allows you to set alerts regarding any expected transfers and event rules within your system, enabling automatic monitoring of your EFT Enterprise environment. Why manually check for unmet SLAs and missing files after the fact, when you could be automatically notified instead? Receive email notifications regarding any unmet workflows, to improve your response time and decrease your management needs.

### EFT Insight provides:

- Responsive insight into data; you are able to adjust what you're seeing on-the-fly instead of using numerous reports
- Automated expectations of business-critical processes to save time verifying transactions and money on unmet agreements
- Separate data from administration to give access to those that need it
- Consolidated data from clustered deployments

## SYSTEM REQUIREMENTS

- EFT Enterprise v7.1 or later
- EFT Audit and Reporting Module (ARM)
- Microsoft Windows Server 2012 R2
- Microsoft .NET v4.5 or later\*
- Microsoft IIS v8\*

\*included in Windows Server 2012 R2 and later

### Included:

- Self-signed SSL certificate (option to provide certificate issued by a trusted provider)
- SQL Server 2014 Express  
(also supported on SQL Server 2008 R2, 2008 R2 Express, 2012, 2014, 2016)

### Supported Browsers:

- Chrome: Latest public release version
- Firefox: Latest public release version
- Internet Explorer: 11 or later
