

# ENHANCED FILE TRANSFER™ (EFT™) ENTERPRISE MODULES

## KEY RESULTS

**Security** - Keep data out of the DMZ, meet or exceed compliance standards, secure data in transit/at rest, use a variety of authentication options, and protect files from malware and data loss.

**Automation** - Automate routine, recurring transfers and define complex, advanced workflows for integration with backend system

**Visibility** - Know what employees and partners are transferring and keep an eye on your network with auditing and reporting tools.

**Ad hoc transfers** - Provide employees and partners secure, easy ways to exchange files over mobile devices, on the web, or with a client like CuteFTP®.

**Standard protocols** - Exchange files with partners/customers using industry-standard protocols, FTP/S, HTTP/S, SFTP/SSH, AS2

Enhanced File Transfer (EFT) Enterprise is a customizable managed file transfer platform trusted by thousands of businesses worldwide for its unmatched simplicity and military-grade security. EFT Enterprise gives you automated processes, two-factor authentication, easy installation and administration, and intuitive interfaces.

The flexible, modular approach to the licensing is accompanied by a per server-instance license. There are no limitations on the amount of connections, users, bandwidth, or CPU utilization for the product, except in the case of the file sharing modules, which are licensed per user. All module features are available during the 30-day trial.

## SECURITY

**Advanced Authentication module** - The Advanced Authentication module provides support for multiple authentication methods, including Common Access Card, SAML (WebSSO), RADIUS, and RSA® SecurID®. By centralizing authentication, users can use a single source of authentication across the IT resources they use, including EFT Enterprise.

**Content Integrity Control module** - The Content Integrity Control module is used to send files to an antivirus scanner or DLP solution for processing.

**DMZ Gateway®** - Our multi-platform, multi-layered security solution does not store or process data. It's simply a liaison through the "Demilitarized Zone" to your internal network. Your proprietary data always remains safe behind the firewall for EFT Enterprise to store and process.

**High Security module** - The High Security Module (HSM) achieves or exceeds security practices mandated by the most rigorous standards, such as PCI DSS, FIPS 140-2, HIPAA, and Sarbanes-Oxley (SOX).

**OpenPGP module** - Secure your "data at rest" on a server using OpenPGP data encryption technology.

## WORKFLOW AUTOMATION

The built-in Event Rule triggers in EFT Enterprise include AS2 events, connection events, file system events, operating system events, Server/Site events, user events, Workspaces events, and folder monitor events. Additionally, the **Advanced Workflow Engine** automates your complex business processes, including integrating with backend systems.

## PROTOCOLS

EFT Enterprise includes the HTTP/S and SFTP modules for secure data exchange. Additionally, the Applicability Statement 2 **AS2 module** specifies how to connect, deliver, validate, and acknowledge data, and creates an "envelope" for a message, which is then sent securely over the Internet. AS2 is widely used to transfer Electronic Data Interchange (EDI) messages, but it can also be used to transfer other types of data.

---

## ABOUT GLOBALSCAPE

Globalscape is a pioneer in securing and automating the movement and integration of data seamlessly in, around and outside your business, between applications, people and places, in and out of the cloud. Founded in 1996, Globalscape's data exchange and integration software and services are trusted by over 13,000 customers in over 150 countries worldwide, including global enterprises, governments, and small and medium enterprises. Headquartered in San Antonio, TX, Globalscape enables companies to increase business agility by unleashing the power of data. Whether you are a line-of-business stakeholder struggling to connect multiple cloud applications or an IT professional tasked with integrating partner data into homegrown or legacy systems, Globalscape provides cloud services that automate your work, secure your data and integrate your applications – while giving visibility to those who need it. Globalscape makes business flow brilliantly. Globalscape has consistently been named a top workplace by Computerworld, the San Antonio Business Journal, Texas Monthly, and the San Antonio Express-News, among others.

## VISIBILITY

**Auditing and Reporting (ARM) module** - Save time by running dozens of reports automatically with our advanced auditing and reporting module. Use built-in and custom report templates to spend your time productively rather than spending hours combing through enormous piles of data.

**Business Activity Monitoring (BAM) module** - BAM provides real-time activity monitoring for admins, partners, and end users. The BAM charts display key performance indicators such as successful/failed transfers, transaction trends, statistics, and EFT logs.

**EFT Insight** - Our business and operational intelligence platform provides visibility into server health, file transfer, Event Rules, and compliance in an easy-to-read dashboard.

## AD HOC FILE TRANSFERS

**Mobile Transfer Client** - Get secure anytime, anywhere access to information on EFT Enterprise on a mobile device. Licensed per user account.

**Web Transfer Client** - Provide your business partners with access to EFT Enterprise with our thin web client that can be used on any modern browser, leaving a small footprint that's easy on your resources. Unlimited WTC seats is included in EFT Enterprise.

**Workspaces module** - Workspaces is an enterprise secure file sharing solution that allows employees to easily and securely exchange folders and their files with internal and external users, without sacrificing the highest levels of control, visibility, and governance. The Workspaces module for EFT Enterprise is the only file sharing solution that supports customizable workflow automation. Workspaces is licensed per Workspaces owner.
