

# EFT™ AUTOMATION DEVELOPMENT

## KEY RESULTS

- **Maximize** out-of-the-box EFT functionality
- **Project-based deliverables** with fixed price and fixed scope
- Helps **minimize risk** on your automation project

**EFT™ Automation Development** is a fixed-price, fixed-scope service designed to deliver automation development for customers who have pre-determined, specific business requirements. Our consultants combine their deep understanding of the EFT server with a wealth of automation experience to help you successfully complete your automation project while minimizing risks along the way. The EFT Automation Development service uses out-of-the-box event rules and our automation engine to maximize EFT core functionality and ensure you are getting the most out of your EFT platform.

## EFT™ AUTOMATION DEVELOPMENT SERVICE PROVIDES:

- Analysis and design
- Automation code or script development best practices
- Implementation/deployment
- Testing
- Robust documentation
- Knowledge transfer
- Project Management

## APPROACH

EFT Automation Development follows 3 phases:

1. **Design and Analysis:** The first phase of EFT Automation Development is to work collaboratively with the customer to perform a deep analysis of business requirements and acceptance criteria. This is to ensure all requirements are captured and all test cases are clearly defined. Automation requirements are then formalized and work can begin on implementation.
2. **Implementation phase:** During the Implementation phase, we will perform knowledge transfer, complete documentation, create code, deploy code, and test functionality.
3. **Steady State Phase:** The third phase involves completing implementation tasks, troubleshooting, validation, and testing.

Put our automation experts to work for you to help ensure a successful project with maximum benefits.

**Contact our Professional Services Team** to ask about **EFT Automation Development** service today!

## ABOUT GLOBALSCAPE

Globalscape, Inc. (NYSE MKT: GSB) is a pioneer in securing and automating the movement and integration of data seamlessly in, around and outside your business, between applications, people and places, in and out of the cloud.
