

Professional Services – Quick Start Service

- Get started in just three days with a fully-functioning system tailored to your business requirements.
- Why tie up your internal staff? Let a Globalscape Certified Professional bring EFT to life, fully configured for your operating environment.

GLOBALSCAPE® QUICK START SERVICE ACCELERATES EFT IMPLEMENTATION WITHIN YOUR ORGANIZATION.

We know you have many other responsibilities and priorities. Rather than adding EFT to your to-do list, let Globalscape put it together for you promptly with our Quick Start service.

A Globalscape Certified Professional will install and configure the solution, test it thoroughly, train your staff on basic operation and architecture, and document the settings. Get it done right the first time, with a system that's fully ramped up and ready for you to put it to work.

Three days to file transfer automation

Our Quick Start service includes:

- Evaluating your file transfer needs and creating a requirements document and implementation plan
- Mapping existing policies, standards and procedures, and recommending improvements where needed
- Developing event rules based on your workflow requirements
- Installing and configuring the solution within your network
- Testing connectivity internally and over the Internet
- Training your staff in basic operation and architecture of the solution
- Fully documenting the configuration including utilities/tools where applicable

Other implementation offerings

Please consider these other valuable service offerings from Globalscape:

- **Training and Certification**—Learn EFT from a Globalscape expert, with classroom and hands-on training from entry- level up to professional certification.
- **EFT High Availability Solution**—A bundle of software licenses and services to achieve a load-balanced, highly available installation of EFT.
- **Security Assessment and Remediation**—Our security and IT professionals will help you develop a secure file transfer policy that addresses regulatory requirements and your own corporate policies.
- **EFT Account Migration**—Globalscape will help you import your existing user accounts into EFT.
- **Customization Services**—Globalscape engineers provide custom services that complement and extend the capabilities of our software. Offerings range from customized branding solutions to development of client-specific administration and reporting tools.

ABOUT GLOBALSCAPE
